HEALTH & SOCIAL CARE

COMPLEX CARE TEAM

*Your Care, Your Choice,*

*Our Responsibility*

*"Our dedicated team facilitate each service user to live as independently as possible through maximizing their potential, enabling each individual to enjoy real quality of life with family, friends and loved ones whilst maintaining dignity and respect."*

We deliver the highest quality of personalised, outcome focused care to adults & children

Established in 1995 Network Health & Social Care have been successfully delivering high quality domiciliary care services throughout the UK.

Building on this success, Network Health have now invested in, and established a specialist complex care team to deliver the highest standards of individualised care to adults & children with the most challenging & complex conditions, including :

- Ventilator Dependent Clients
- Acquired Brain Injuries
- Spinal Cord Injuries
- Motor Neurone Disease
- Huntington's
- Cerebral Palsy
- Transitional Care
- Learning Disabilities

#### Our clients include -

- NHS
- CCG's
- Case managers
- LHB's
- Solicitors
- Private Patients
- Local authorities
- Private Brokers
- Charities
- Advocacy services

#### As an example of the complex care that we currently deliver:

*JG - 18 - Bristol, JG is an 18 year old male who has Severe Cerebral Palsy (spastic quadriplegia), JG is oxygen dependant, has a tracheostomy in situ and requires suctioning, JG is also epileptic and this requires management with a Vagus Nerve Stimulator.*

*JG had been being cared for by NHS children's services up until the age of transition, JG had formed a close bond with his care team and it was vital to JG and family that the transition of care was as smooth as possible with minimal disruption to routines as possible.*

*We identified a small specialist team to work with JG and after an initial period of introduction, shadow training and competency monitoring the NHS Children's team were able to withdraw their support and JG was successfully transitioned from NHS children's services to our complex care team, enabling JG to stay at home without disruption.*

#### Network Healthcare Can -

- Provide care ranging from a 30 minute domiciliary call through to 24 hour nursing care.
- Facilitate a discharge from an acute environment to a home setting
- Prevent delays in discharge
- Assist care package breakdowns
- Provide a more financially sustainable service for existing packages of care

#### Why Choose Network Health & Social Care

- Person centred, flexible approach
- Each service user has a dedicated RN case manager
- 24 hour RN telephone support
- 18 years of experience
- CQC Registered, meeting & exceeding the minimum standards of CQC
- Financially sustainable
